

Portable Thermometer Hygrometer

ترمو رطوبت سنج پرتابل مدل TEM-108

Model : TEM 108

Temperature range from -10°C to $+50^{\circ}\text{C}$, that is, $+14^{\circ}\text{F}$ to $+122^{\circ}\text{F}$, which is reliable and practical.

Humidity Range from 20% to 99%

Battery: 1 x 1.5V AAA (not included)

High precision: no need for manual calibration, high measurement accuracy, digital display, more convenient data reading.

Simple Operation: Made of high-quality ABS material, the durable thermo-hygrometer will automatically detect when it is activated.

Easy to Carry: The hand-held thermometer is light in weight and small in size, making it easy to carry on a daily basis.

Practical Use: Measure temperature and humidity in various environments. Can be widely used in homes, apartments, industries, laboratories, greenhouses, warehouses, farms, etc.

The temperature detection range is -10°C ~ $+50^{\circ}\text{C}$.

Can be widely used in home, apartment, industry, etc.

TEM-108
